

Amendments to the Specification

The following paragraphs will replace the corresponding paragraphs of record in the present application, as noted hereinbelow.

1. Replace the paragraph beginning on page 2, line 28, with the following:

Accordingly, it is a principal advantage of the present invention to provide a method for designating documents for inclusion in a user defined separate data structure.

2. Replace the paragraph beginning on page 5, line 20, with the following:

Marking of the selected documents can be accomplished by, for example, providing visible highlighting of the selected text. The user can be provided with a "tool bar" which is visible on their computer screen with which they can highlight text, attach notes, summaries, other attachments or the like. Marking of the text can also merely be a tag to include a document in the separate data structure, without highlighting any particular section of text.
